Scrapers and Planes Carl Miller

As we did not have a full program, Carl did a 15-minute presentation on some of the unique scraper planes that he has and how they are used. These small presentations, in my humble opinion are great for passing on our knowledge and experience with many of the woodworking skills and methods that often go overlooked with the “new and improved” power tool methods.

Thanks again Carl!

Les Linton

As we didn't have a program, Khaled sent an email out letting everyone know that we would be doing a 2x4 challenge. Les resawed the 2x4 glued up panels and made a bird house.

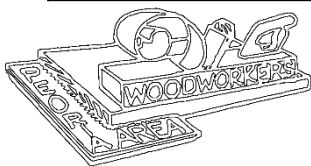

Lee Gatzmeyer

Lee became even more creative and built a curved lamp utilizing led lights.

Peoria Area Woodworkers Club

Good day everyone. Per discussion with others, I wanted to put a list together of items I had thought of.

April – Wooden Box. Any type. Square, rectangle, bandsaw. Anything that could be called a box.

May – Bird Houses. Big, small. Simple. Complex. Could throw in Bat Houses or Bee Hives I think.

June – Turned Project. Again, any size or shape. Exotic Segmented Bowl or a simple Pen or Bottle Stopper.

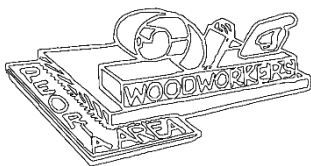

August – Games/Toys. This could be parts of Scroll Saw projects. Cars, Trains, Board Games or Puzzles.

September – Cutting Boards. Quite the rage these days. Any style. Charcuterie Boards or Coasters too.

October – Holiday Crafts. Halloween, Thanksgiving and Christmas. Again, could be Scroll Saw items.

December – What I made for Christmas. Left November blank because many will be working on Christmas.

Nothing is set in stone. Just my beginning thoughts. Something to discuss next week. Suggestions??
